

WEBSITE LAUNCHED TO PROMOTE PRIZES

Revell Research Systems, the Exeter-based management and technology consulting practice, has launched a website to promote its student prize at the University of Plymouth. The consultancy established the prize last year to mark the start of its 21st year in business.

The prize will be awarded this year to the top final year, full-time student on the university's BSc (Hons) in computing degree.

Managing consultant Alastair Revell said: "We are hoping that the prize will encourage the students on the programme to really excel.

"I would very much like to wish them all the very best of luck as they approach their final exams this coming term."

The consultancy, established by Mr Revell in 1985, provides independent and unbiased IT strategy advice, offers networking and systems engineering expertise, and develops software and websites.

Fiona Burgess, the practice's business development manager, said: "Alastair has been closely involved in the development of several IT qualifications awarded by the university, so it seemed appropriate to mark our 21st year in a way that encourages future computer experts to excel."
